Interview Room Recorder

Powered by SoleraTec

The VIR20 Interview Room Recorder is part of the Law Enforcement Solution Series of products optimized for the ARQVault Digital Evidence Management software suite from SoleraTec™. The VIR20 comes in desktop or rack mount form factors and has been loaded with ARQinterview software which has been specifically engineered to make the interview process easier to record, facilitate, annotate, and export.

Interview room audio and video systems need to be high-quality, discrete, and simple to operate and ARQinterview. A single, easy-to-use user interface allows the user to view live video and audio from the interview room cameras and to start the recording remotely with the click of a button. Detectives and administrators can also live view from multiple workstations in remote locations if needed. This system allows the option of any type of camera that suits the user's needs: dome surveillance cameras with pan-tilt-zoom, covert pinhole cameras or even just standard networked surveillance cameras. The VIR20 solution works with thousands of different camera models right out of the box. If bundled with the other Law Enforcement products and the SoleraTec ARQvault, all evidence from any source, body-cameras, interview room recordings and in-car video, can be kept in one secure system making it easy to group evidence by case or any other criteria.

Each VIR20 platform has been configured to support from one to four cameras with resolutions from VGA to multi-mega-pixel running a full 30 frames per second. Storage options are flexible and scalable to support any need.

Features:

- Simple to use interface
- Automated time index with file pinpointing
- Audio via built-in camera microphone or external mic connected to camera
- Extensive camera model/manufacture support
- Industry standard file exports
- Flexible hardware platform to support up to 4 cameras with various recording times
- RAID 1 storage for data protection
- Available in desktop or rack mount form factors

Common Configurations:

VIR20A-2: 3.0 GHz Intel Quad Core Processor, 16GB RAM, 2000 GB of raw RAID 1 storage, Windows 10 PRO

ViSTA Networking Solutions

Specifications:

SUPPLIED ACCESSORIES

Power Cable	1 USA Standard 117VAC, 3 prongs, 6ft
Keyboard	1 USB Keyboard
Mouse	USB, Scroll Wheel, 3 Button
Restore	All original installation discs

SYSTEM

Processor	Intel Core-i5 3.0 GHz Quad Core
Internal Memory	16GB to 32GB DDR RAM
Operating System	Windows 10 Professional
Video Archive Capacity	Up to 4000 GB RAID1
Network Interface	1 10/100 Ethernet RJ-45 (1000BaseT) & 1 802.11a/b/g/n/ac
Auxiliary Interfaces	6 USB Ports (2 USB2 and 4 USB 3.0)

VIDEO

VGA Processing Equivalent	Up to 750 VGA/sec*
Resolution	QCIF to mega-pixel based camera spec
Display	Dual HDMI and DVI Interfaces

ENVIRONMENTAL

Operating	10° to 32° C (50° to 90° F), 8% to 80% (non-condensing)
Storage	-40° to 70° C (-40° to 158° F), 5 to 95% (non-condensing)

PHYSICAL

Enclosure Construction	SGCC Steel
Dimensions	14.4" (H) x 6.8" (W) x 15.5" (D)
Unit Weight (gross)	10 lbs (Approx)

*CIF/sec processing dependent on video surveillance management software package
