

ViSTA Networking Solutions Expands North American Distribution And Partners with SeeStor Distributors

Signing Of Video Surveillance Specific Distributor Reinforces VNS's Position As A Leading Provider Of Video Storage Solutions.

EL DORADO HILLS, Calif. - January 27, 2016 - ViSTA Networking Solutions (VNS) announces it has expanded its North American Distribution network to now include SeeStor, Inc, a physical security oriented distributor out of Southern California. VNS will offer specific servers and storage products through the SeeStor distributor network.

“We are encouraged by SeeStor’s focus on security integrators across North American and expect them to showcase VNS product offerings to these customers,” stated Graham Joys, President of VNS. “SeeStor has a number of integrated solutions that highlight the features and functionality of VNS products.”

Vista Networking Solutions products such as NVR, mobile NVR, and external storage platforms deliver performance and configurations needed by small, medium, and large operations. From eight to 96Terabyte storage solutions, VNS has the right configuration for today’s demanding security manager.

“VNS servers and storage products are ideal products for our system integrator customers and the eventual end-user. These products offer the capabilities that today’s informed customers are asking for at truly affordable prices,” stated Jay Jason Bartlett, VP Sales and Marketing, SeeStor, Inc. “We look forward to sharing the quality and configurations of the VNS offering and believe our reseller customers and eventual end-users will benefit from these products.”

SeeStor will offer the VNS product line individually and as an integrated component(s) to a complete video surveillance storage solution. SeeStor’s ability to build customer-specific solutions allows for VNS products to offer the best performance and functionality for each requirement.
