

PlateSmart Mobile Defender™

PlateSmart is proud to offer our latest in-car native mobile solution; Mobile Defender™ and Mobile Defender Lite™. Mobile Defender™ is a purpose built in-vehicle automatic license plate recognition (ALPR) capture and alerting system for law enforcement that works seamlessly with PlateSmart ARES® 3 ALPR software as part of a complete enforcement, investigative and analytic solution.

PlateSmart Mobile Defender™

- Supports up to 3 cameras per vehicle
- On-screen and audio alerts in real-time
- NCIC and state-issued BOLO hotlists are supported
- Off-line login and operation for up to 30 days
- All data are encrypted on the network and on the disk
- Alerts are uploaded to ARES® 3 for storage and future investigation
- Off-line alert and plate search/lookup
- Receive alerts from other vehicle Mobile Defender™ and fixed ALPR cameras

Real time in-vehicle alerts that help officers focus on the job and not the technology.

PlateSmart Mobile Defender™ Kit

- 3 cameras*
- 1 ALPR processing computer
- 1 low voltage disconnect switch
- Accessories
- 1st year support
- 1 remote training session

PlateSmart Mobile Defender Lite™ Kit
